

Organic Dryland Grain Crop Field Day

TUESDAY JUNE 15TH 9 A.M. TO NOON

Are you interested in transitioning to organic production, improving your existing practice, or learning about organic dryland grain production in the PNW? Then join us for the second annual Organic Dryland Grain field day located at Les & Pat Boyde's farm, just north of the Moscow-Pullman Airport, on Airport Road. Enjoy organic fruit and pastries from the Moscow Food Coop.

In 2003, a systems study was initiated at this site with funds from the USDA to determine the most optimal system for the transition period to certified organic production. In 2004, an organic breeding project, green manure, and mechanical weed management trials were also initiated to assist producers in optimizing their organic management

Presentations:

Dr. Rob Gallagher:

Organic weed control

Robert Venable:

Microbial Weed Control

Organic Farm Advisor:

Trials and success in organic grain farming

Dennis Pittmann:

Rotary hoe prototype and harrow demonstration

Lori Hoagland:

Organic transition systems project

Kevin Murphy:

Organic spring wheat breeding project

Suzanne Kopan:

Mechanical Weed control trial

Dr. Clarice Coyne:

Organic Fertility Management

Dr. Bill Snyder:

Organic Pest Management

Kathy Colin - Peck:

WSU Organic Agriculture Degree Program
